

## **Guidelines for Critical Thinking During Discussions**

### **1. Stay on topic**

What is your main point/ your specific example/idea/concern?

### **2. Be prepared to share supporting evidence for your ideas.**

What is your supporting evidence?                      Why do you believe that is true?

### **3. Elaborate on your ideas to show how you can apply them to the topic.**

Share specific details about your idea.                      What makes your idea valid?

### **4. Summarize your idea when asked.**

Restate your idea in a different way if people are confused or believe contradictory information.

### **5. Evaluate and adjust your ideas as needed.**

What evidence best supports your belief? How does your idea fit in with other classmates' ideas?
