

Clock Face Race

OBJECTIVES: To cover and then uncover every number on the clock face.

MATERIALS: (each player)

- 2 dice
- 1 game board
- 12 markers

BEST USE: To practice using basic facts.

RULES:

1. This is a race. Begin play with 2, 6-sided dice. Add the numbers or subtract one from the other and cover that number on your game board.
2. If you can not add or subtract to make a number that is still uncovered, you must remove one covered number marker as a penalty.
3. Play until you cover every number on the clock face.
4. Once every number covered, reverse the process: on each turn uncover one number by adding or subtracting. If you roll and cannot uncover a number, you must put a marker back on an uncovered number as your penalty.
5. The first person to cover and then clear their clock face wins.

OPTIONS:

1. Use 3 or 4 dice.
2. Agree to just add or just subtract to cover a number on the clock face.
3. Set a timer for an agreed upon amount of time (between 3 and 5 minutes). When the time runs out the player with the most clock face numbers covered wins. Reset the timer and remove one marker on each roll of the dice.
4. Use up to 4 dice with anywhere from 8 to 12-sides.
